

### Advisory Recommendations from 09/06/2013 Meeting

Material Presented/Requested	Advisory Group Recommendations	NGS Action
Home Health Data Review	Sally stated 132 New York HHAs were at the 10 percent cap. The members felt that the New York HHA count is too high and asked Sally to request the data again making sure that the count includes NY HHAs only.	Sally requested information specifically for NY providers. The results came back indicating 104 HHAs exceeded the outlier cap.
